*1 Model SHS : Dedicated cap GC --- not applicable to only model SHS15
*2 Model SSR : Dedicated cap GC --- not applicable to model SSR15, Stainless steel LM Guides --- applicable to XV, XW
*3 Model SHW : GG, PP --- applicable to only model SHW21, Dedicated cap GC --- applicable to SHW35, 50
*4 Model SRS : Dedicated cap C --- applicable to models SRS9W, 12, 15, 20, 25
*5 Model SCR : Dedicated cap GC --- not applicable to only model SCR15
*6 Model HSR : ZZ, KK --- grease nipple cannot be attached to model HSR15,
GG --- applicable to model HSR25, Steel tape SP --- applicable to models HSR15 to 100, Dedicated cap C --- applicable to models HSR12 to 100,
Dedicated cap GC --- applicable to models HSR20 to 100,
Dedicated LM cover --- applicable to models HSR25 to 55,
Inner seal --- applicable to models HSR30 to 85
*7 Model SR : ZZ, KK --- grease nipple cannot be attached to models SR15, 20.
Dedicated cap C --- applicable to models SR15 to 85, dedicated cap GC --- applicable to models SR20 to 85,
Stainless steel LM Guides --- applicable to models SR15 to 35
*8 Model NR : DD,ZZ,KK and HH --- side nipple required for model NR100, Plate cover SV --- applicable to models NR35 to 75,
Dedicated cap C and GC --- not applicable to only model NR75

*18 Model SRG : DD --- side nipple required for model SRG100.
Plate cover SV --- applicable to models SRG25, 35 to 100

Seal and Metal scraper

- For the supported models, see the table of options by model number on A1-456.
- For the LM block dimension (dimension L) with seal attached, see A1-467 to A1-474.
- For the maximum seal resistance, see A1-480 to A1-482.

Item name	Schematic diagram / mounting location	Purpose/location of use
End Seal		Used in locations exposed to dust
Side Seal		Used in locations where dust may enter the LM block from the side or bottom surface, such as vertical, horizontal and inverted mounts
Inner Seal		Used in locations severely exposed to dust or cutting chips
Double Seals		Used in locations exposed to much dust or many cutting chips
Metal Scraper (Non-contact)		Used in locations where welding spatter may adhere to the LM rail

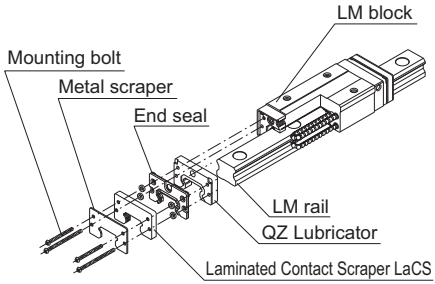
Symbol	Contamination Protection Accessories
UU	With end seal
SS	With end seal + side seal + inner seal*
DD	With double seals + side seal + inner seal*
ZZ	With end seal + side seal + inner seal* + metal scraper
KK	With double seals + side seal + inner seal* + metal scraper

* Some models are not equipped with inner seals.(See A1-456)

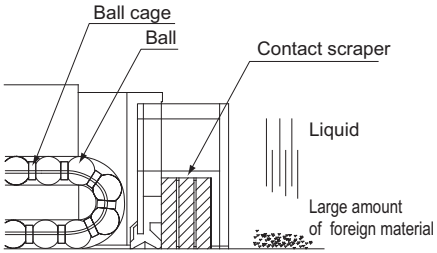
Laminated Contact Scraper LaCS

●For the supported models, see the table of options by model number on A1-456.
●For the LM block dimension (dimension L) with LaCS attached, see A1-467 to A1-474.
●For the resistance of LaCS, see A1-483.
●For notes regarding how to handle the LaCS, refer to A1-529.

For locations with adverse environment, Laminated Contact Scraper LaCS is available.
LaCS removes minute foreign material adhering to the LM rail in multiple stages and prevents it from entering the LM block with laminated contact structure (3-layer scraper).



Appearance Drawing



Structural Drawing

[Features]

- Since the 3 layers of scrapers fully contact the LM rail, LaCS is highly capable of removing minute foreign material.
- Since it uses oil-impregnated, foam synthetic rubber with a self-lubricating function, low friction resistance is achieved.

Symbol	Contamination Protection Accessories
SSHH	With end seal + side seal + inner seal*1 + LaCS
DDHH	With double seals + side seal + inner seal *1 + LaCS
ZZHH	With end seal + side seal + inner seal *1 + metal scraper + LaCS
KKHH	With double seals + side seal + inner seal *1 + metal scraper + LaCS
JJHH*2	With end seal + side seal + inner seal*1 + LaCS + protector (serving also as metal scraper)
TTHH*2	With double seals + side seal + inner seal*1 + LaCS + protector (serving also as metal scraper)

*1 Some models are not equipped with inner seals.(See A1-456)

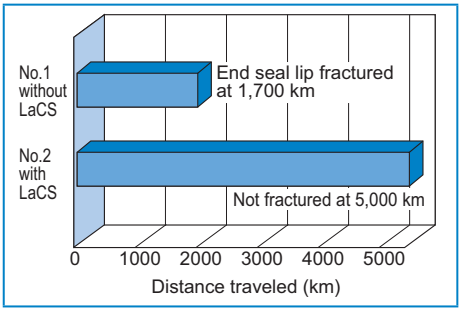
*2 JJHH and TTHH are available only for models SVR/SVS.
Note) HH type (with LaCS) of models SVR/SVS is provided with the protector (see A1-465).
Contact THK if you want to use the Protector with other options.

● Test under an Environment with a Water-soluble Coolant

[Test conditions] Test environment: water-soluble coolant

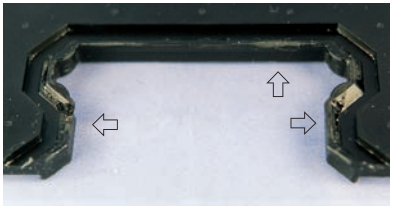
Item		Description
Tested model	No.1	SHS45R1SS+3000L (end seal only)
	No.2	SHS45R1SSHH+3000L (end seal and LaCS)
Maximum speed		200m/min
Environmental conditions		Coolant sprayed: 5 time per day

[Test result]



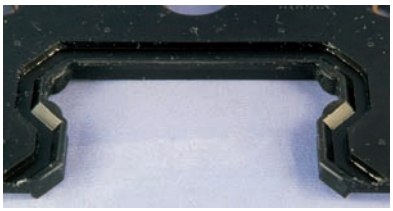
Magnified view of the end seal lip

No. 1: without LaCS - lip fractured at 1,700 km



⇦Areas marked with arrow are fractured

No. 2: with LaCS - no anomaly observed after traveling 5,000 km



Lip has not been fractured

● Test under an Environment with Minute Foreign Matter

[Test conditions] Test environment: minute foreign material

Item		Description
Tested model	No.1	Caged Ball LM Guide #45R (DD+600L) double seals only
	No.2	Caged Ball LM Guide #45R (HH+600L) LaCS only
Max speed/ acceleration		60m/min, 1G
External load		9.6kN
Foreign material conditions		Type: FCD450#115 (particle diameter: 125 μm or less)
		Sprayed amount: 1g/1hour (total sprayed amount: 120 g)

No. 1 Traveled 100 km (double-seal configuration)

Large amount of foreign matter has entered the raceway

[Test result] Amount of foreign material entering the raceway

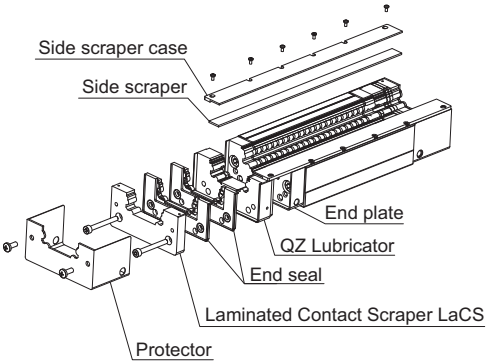
Seal configuration		Amount of foreign material entering the raceway g
Double-seal configuration (2 end seals superposed with each other)	Tested model 1	0.3
	Tested model 2	0.3
	Tested model 3	0.3
LaCS	Tested model 1	0
	Tested model 2	0
	Tested model 3	0

No. 2 Traveled 100 km (LaCS only)

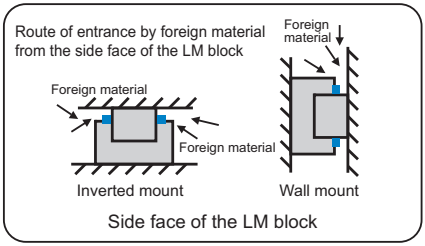
No foreign matter entering the raceway observed

Side Scraper

- For the supported models: models SVR/SVS
- For the resistance of side scraper, see A1-484.
- For the LM block dimension (dimension L) with side scraper attached, see A1-467.
- For notes regarding how to handle the side scraper, see A1-529.

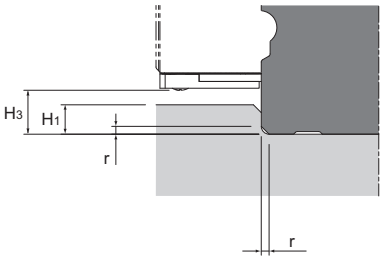


Outline view
(Ex: in case of QZTTHHYY type)



[Features]

- Minimizes foreign material entering from the side of the LM Guide in a harsh environment.
- Demonstrates a dust protection effect in inverted or wall mount.



Side view of the LM block after the side scraper is mounted

The shoulder height of the mounting surface and the corner radius after the side scraper is mounted

Unit: mm

Model No.	Corner radius r(max)	Shoulder height of the LM rail H_1	H_3
25	0.5	2	2.7
30	1	3.5	4.2
35	1	5.5	6.2
45	1	8	8.8
55	1.5	10.5	11.2
65	1.5	11	12.1

Note) Note that the side scraper is not sold alone.

Model number coding

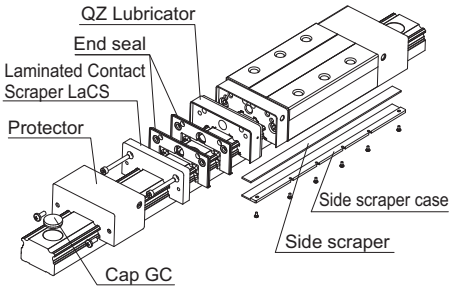
SVR45 LR 1 QZ JJHH YY C1 +1200L

YY: With side scraper*

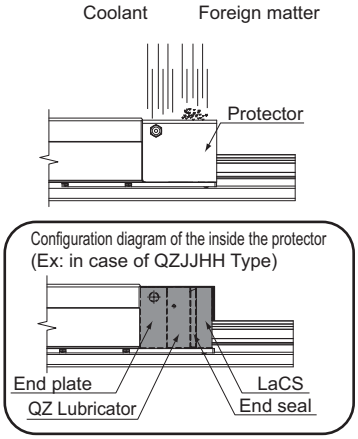
* The side scraper can accommodate various options of dust control accessories and lubrication accessories. For details, contact THK.

Protector

- For the supported models: models SVR/SVS
- HH type (with LaCS) of models SVR/SVS is provided with the protector.
- For the LM block dimension (dimension L) with protector attached, see A1-467.

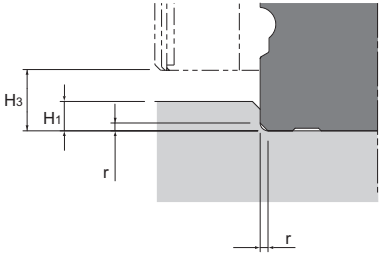


Outline view
(Ex: in case of QZTTHHYY type)



[Features]

- The protector minimizes the entrance of foreign material even in harsh environments where foreign material such as fine particles and liquids are present.

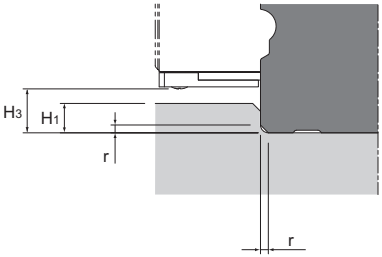


Side view of the LM block after the protector is mounted

The shoulder height of the mounting surface and the corner radius after the protector is mounted

Unit: mm

Model No.	Corner radius r(max)	Shoulder height of the LM rail H_1	H_3
25	0.5	4	5.5
30	1	5	7
35	1	6	9
45	1	8	11.6
55	1.5	10	14
65	1.5	10	15



Side view of the LM block after the protector and side scraper are mounted

The shoulder height of the mounting surface and the corner radius after the protector and side scraper are mounted

Unit: mm

Model No.	Corner radius r(max)	Shoulder height of the LM rail H_1	H_3
25	0.5	2	2.7
30	1	3.5	4.2
35	1	5.5	6.2
45	1	8	8.8
55	1.5	10.5	11.2
65	1.5	11	12.1

Note) Contact THK if you want to use the protector with other options.

Light-Resistance Contact Seal LiCS

- For the supported models, see the table of options by model number on A1-456.
- For the LM block dimension (dimension L) with LiCS attached, see A1-478.
- For the resistance of LiCS, see A1-484.
- For notes regarding how to handle the LiCS, see A1-530.

LiCS is a light sliding resistance contact seal. It is effective in removing dust on the raceway and retaining a lubricant such as grease. It achieves extremely low drag and smooth, stable motion.

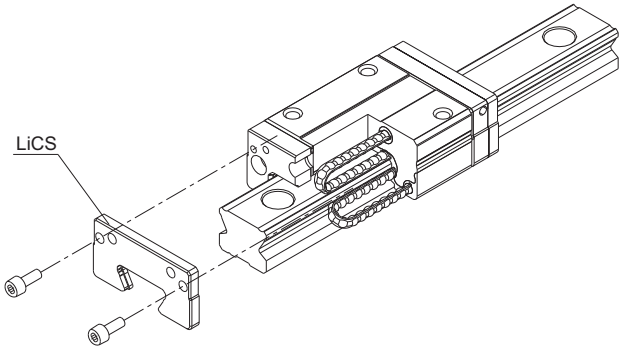


Fig.1 Structural Drawing of SSR + LiCS

[Features]

Light-Resistance Contact Seal LiCS is a seal that uses a light-resistance material in its sealing element and contacts the LM rail raceway to achieve low drag resistance. It is optimal for applications where low drag resistance is required, such as semiconductor-related devices, inspection devices and OA equipment all of which are used in favorable environments.

- Since the sealing element contacts the LM rail raceway, it is effective in removing dust on the raceway.
- Use of oil-impregnated, expanded synthetic rubber, which has excellent self-lubricating property, achieves low drag resistance.

Model number coding

SSR20 XW 2 GG C1 +600L P -II

- SSR20: LM Guide model number
- XW: Type of LM block
- 2: No. of LM blocks used on the same rail
- GG: With LiCS seal on both ends
- C1: Radial clearance symbol — Normal (No symbol), Light preload (C1), Medium preload (C0)
- +600L: LM rail length (in mm)
- P: Accuracy symbol — Normal grade (No Symbol) / High accuracy grade (H), Precision grade (P) / Super precision grade (SP), Ultra precision grade (UP)
- -II: Symbol for No. of rails used on the same plane

Symbol	Contamination Protection Accessories
GG	LiCS
PP	With LiCS + side seal + inner seal*

* Some models are not equipped with inner seals.(See A1-456)

✻ The overall LM block length (L) of YY type (with side scraper) is also the same.

Note1) The standard overall length may include the dimension of the end seal depending on the model. If you are considering using a type without an end seal, contact THK for details.

Note2) For models SVR/SVS, we recommend attaching a protector. For the dimensions of ZZHH and KKHH, contact THK. For details of the symbols of options, see **A1-492**.

Model number coding

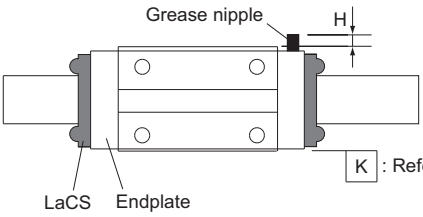
SHS25 LC 2 QZ KKHH C0 +1200L P Z T -II

- SHS25: Model number
- LC: Type of LM block
- 2: No. of LM blocks used on the same rail
- QZ: With QZ Lubricator (*1)
- KKHH: Contamination protection accessory symbol (*2)
- C0: Radial clearance symbol (*3)
  - Normal (No symbol)
  - Light preload (C1)
  - Medium preload (C0)
- +1200L: LM rail length (in mm)
- P: Accuracy symbol (*4)
  - Normal grade (No Symbol)
  - High accuracy grade (H)
  - Precision grade (P)/Super precision grade (SP)
  - Ultra precision grade (UP)
- Z: With steel tape
- T: Symbol for LM rail jointed use
- -II: Symbol for No. of rails used on the same plane (*5)

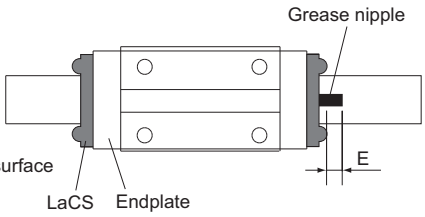
(*1) See **A1-485**. (*2) See **A1-492**. (*3) See **A1-70**. (*4) See **A1-75**. (*5) See **A1-13**.

Note) This model number indicates that a single-rail unit constitutes one set. (i.e., required number of sets when 2 rails are used in parallel is 2 at a minimum.)
Those models equipped with QZ Lubricator cannot have a grease nipple.

Incremental Dimension with Grease Nipple (When LaCS is Attached)



Grease nipple mounting location
for models SHS, SSR, SVR/SVS, SRG and NR/NRS



Grease nipple mounting location
for models SHW, SRS and HSR

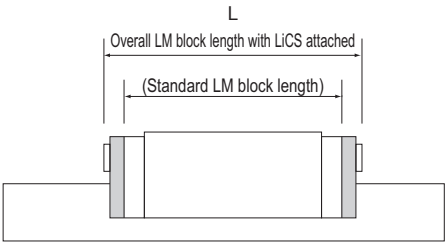
	25A/B/R/CA/CB/YR	9	B-M6F
	25LA/LB/LR/HA/HB	9	B-M6F
	30A/B/R/CA/CB/YR	9	B-M6F
	30LA/LB/LR/HA/HB	9	B-M6F
	35A/B/R/CA/CB/YR	8	B-M6F
	35LA/LB/LR/HA/HB	8	B-M6F

Note1) When desiring the mounting location for the grease nipple other than the above, contact THK.
Note2) Those models equipped with QZ Lubricator cannot have a grease nipple. When desiring both QZ Lubricator and a grease nipple, contact THK.
Note3) When desiring a grease nipple for model SHW or SRS without QZ Lubricator, indicate “with grease nipple” when placing an order. (If not, a grease nipple will not be attached.)
Note4) Model HSR15 attached with ZZ or KK cannot have a grease nipple. Contact THK for details.

LM Block Dimension (Dimension L) with LiCS Attached



Unit: mm

Model No.			L	
		Standard overall length	GG	PP

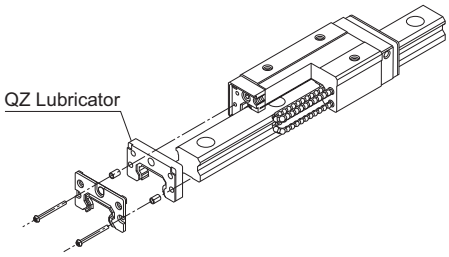
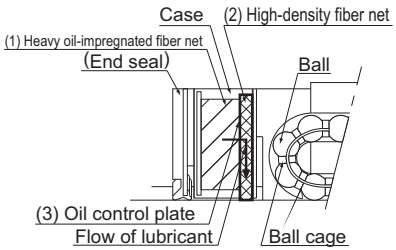
QZ Lubricator

●For the supported models, see the table of options by model number on A1-456.
●For the LM block dimension with QZ attached, see A1-488 to A1-491.
●For notes regarding how to handle the QZ, see A1-529.

QZ Lubricator feeds the right amount of lubricant to the raceway on the LM rail. This allows an oil film to continuously be formed between the rolling element and the raceway, and drastically extends the lubrication and maintenance intervals.
The structure of QZ Lubricator consists of three major components: (1) a heavy oil-impregnated fiber net (function to store lubricant), (2) a high-density fiber net (function to apply lubricant to the raceway) and (3) an oil-control plate (function to adjust oil flow). The lubricant contained in QZ Lubricator is fed by the capillary phenomenon, which is used also in felt pens and many other products, as the fundamental principle.



Appearance Drawing



Structural Drawing

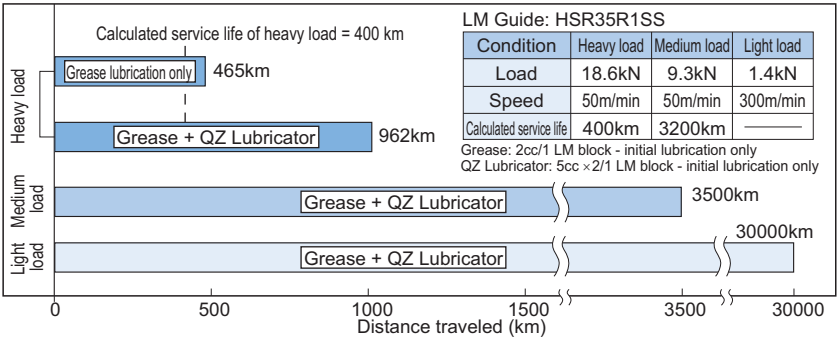
[Features]
- Since it supplements an oil loss, the lubrication maintenance interval can be significantly extended.
- Eco-friendly lubrication system that does not contaminate the surrounding area since it feeds the right amount of lubricant to the ball raceway.

Symbol	Contamination Protection Accessories
QZUU	With end seal + QZ
QZSS	With end seal + side seal + inner seal*1 + QZ
QZDD	With double seals + side seal + inner seal*1 + QZ
QZZZ	With end seal + side seal + inner seal*1 + metal scraper + QZ
QZKK	With double seals + side seal + inner seal*1 + metal scraper + QZ
QZGG	With LiCS + QZ
QZPP	With LiCS + side seal + inner seal*1 + QZ
QZSSHH	With end seal + side seal + inner seal*1 + LaCS + QZ
QZDDHH	With double seals + side seal + inner seal*1 + LaCS + QZ
QZZZHH	With end seal + side seal + inner seal*1 + metal scraper + LaCS + QZ
QZKKHH	With double seals + side seal + inner seal*1 + metal scraper + LaCS + QZ
QZJJHH*2	With end seal + side seal + inner seal*1 + LaCS + QZ + protector (serving also as metal scraper)
QZTTHH*2	With double seals + side seal + inner seal*1 + LaCS + QZ + protector (serving also as metal scraper)

*1 Some models are not equipped with inner seals.(See A1-456)
*2 QZJJHH and QZTTHH are available only for models SVR/SVS.
Note) HH type (with LaCS) of models SVR/SVS is provided with the protector (see A1-465).
Contact THK if you want to use the Protector with other options.

● Significantly Extended Maintenance Interval

Attaching QZ Lubricator helps extend the maintenance interval throughout the whole load range from the light load area to the heavy load area.



LM Guide: HSR35R1SS

Condition	Heavy load	Medium load	Light load
Load	18.6kN	9.3kN	1.4kN
Speed	50m/min	50m/min	300m/min
Calculated service life	400km	3200km	———

Grease: 2cc/1 LM block - initial lubrication only
QZ Lubricator: 5cc ×2/1 LM block - initial lubrication only

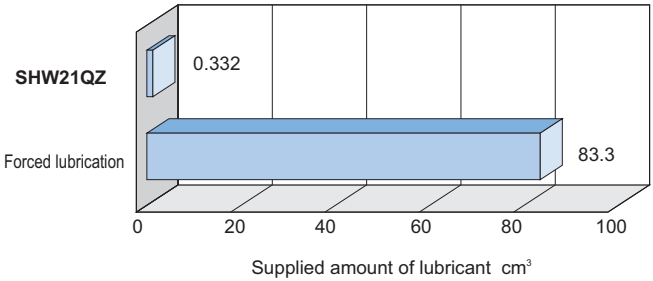
LM Guide Running Test without Replenishment of Lubricant

● Effective Use of Lubricant

Since the lubricator feeds the right amount of lubricant to the ball raceway, lubricant can be used efficiently.

[Test conditions] speed: 300 m/min

Comparison of lubricant consumption after traveling 5,000 km



Amount of oil contained in QZ Lubricator
0.166cm³/ 2 units
(attached to both ends of the LM block)
=0.332cm³

Compared

Forced lubrication
0.03cm³/6min×16667min
=83.3cm³

Lubricant consumption is 1/250 less than forced lubrication.

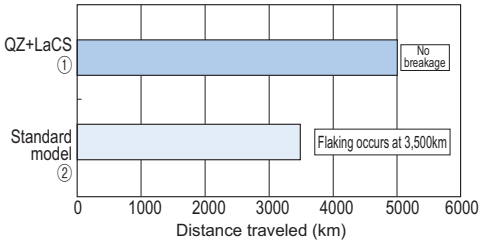
● Effective in Helping Lubrication under Severe Environments

A 5,000 km durability test was conducted under severe environments (containing coolant and contaminated environment).

[Test conditions]

Model No.	① Caged Ball LM Guide #45	② Full-ball LM Guide #45
Load	8kN	6kN
Speed	60m/min	
Coolant	Immersed 48 hrs, dried 96 hrs	
Foreign material	Foundry dust (125 μm or less)	
Lubrication	AFA Grease + QZ	Super Multi 68 Oiling cycle: 0.1cc/shot Periodically lubricated every 16 min

[Test result]



* When using the LM system under severe environment, use QZ Lubricator and Laminated Contact Scraper LaCS (see "Laminated Contact Scraper LaCS" on **A1-462**) in combination.

* The overall LM block length (L) of YY type (with side scraper) is also the same.
Note) For models SVR/SVS, we recommend attaching a protector. For the dimensions of QZZZHH and QZKKHH, contact THK. For details of the symbols of options, see A1-492.

Model number coding

SHS25 LC 2 QZ KKHH C0 +1200L P Z T -II

- SHS25: Model number
- LC: Type of LM block
- 2: No. of LM blocks used on the same rail
- QZ: With QZ Lubricator (*1)
- KKHH: Contamination protection accessory symbol (*2)
- C0: Radial clearance symbol (*3)
  - Normal (No symbol)
  - Light preload (C1)
  - Medium preload (C0)
- +1200L: LM rail length (in mm)
- P: Accuracy symbol (*4)
  - Normal grade (No Symbol)
  - High accuracy grade (H)
  - Precision grade (P)/Super precision grade (SP)
  - Ultra precision grade (UP)
- Z: With steel tape
- T: Symbol for LM rail jointed use
- -II: Symbol for No. of rails used on the same plane (*5)

(*1) See A1-485. (*2) See A1-492. (*3) See A1-70. (*4) See A1-75. (*5) See A1-13.

Note) This model number indicates that a single-rail unit constitutes one set. (i.e., required number of sets when 2 rails are used in parallel is 2 at a minimum.)
Those models equipped with QZ Lubricator cannot have a grease nipple.

List of Parts Symbols

● For supported model numbers, see the correspondence table of options by model number on **A1-456**.

● For the overall block length (dimension L) of each model with seal options attached, see **A1-467** to **A1-474**.

●For the overall block length (dimension L) with the QZ option attached, see **A1-488** to **A1-491**.

[Symbols for Seals and Metal Scraper]

Symbol	Configuration of seal and metal scraper
No Symbol	Without seal
UU	End seal
SS	With end seal + side seal + inner seal*
DD	With double seals + side seal + inner seal*
ZZ	With end seal + side seal + inner seal* + metal scraper
KK	With double seals + side seal + inner seal* + metal scraper

* Some models are not equipped with inner seals.(See **A1-456**)

[Symbols for QZ Lubricator and Laminated Contract Scraper LaCS]

Symbol	Configuration of options	Example
＊＊HH	(Seal and metal scraper) + LaCS	UUHH
＊＊HHYY	(Seal and metal scraper) + LaCS + side scraper	DDHHYY
QZ＊＊	With QZ + (seal and metal scraper)	QZZZ
QZ＊＊HH	With QZ + (seal and metal scraper) + LaCS	QZZZHH
QZ＊＊HHYY	With QZ + (seal and metal scraper) + LaCS + side scraper	QZKKHHYY

Note) ＊＊ in the table represents the symbol for a seal and metal scraper.

[Symbols for Light-Resistance Contact Seal LiCS]

Symbol	Configuration of options
GG	LiCS
PP	With LiCS + side seal + inner seal*
QZGG	With QZ + LiCS
QZPP	With QZ + LiCS + side seal + inner seal*

* Some models are not equipped with inner seals.(See **A1-456**)

[Symbols for Protector]

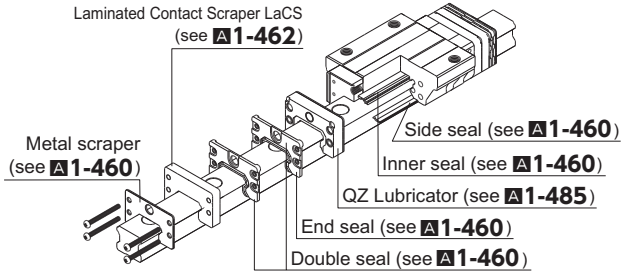
* Supported models: SVR/SVS

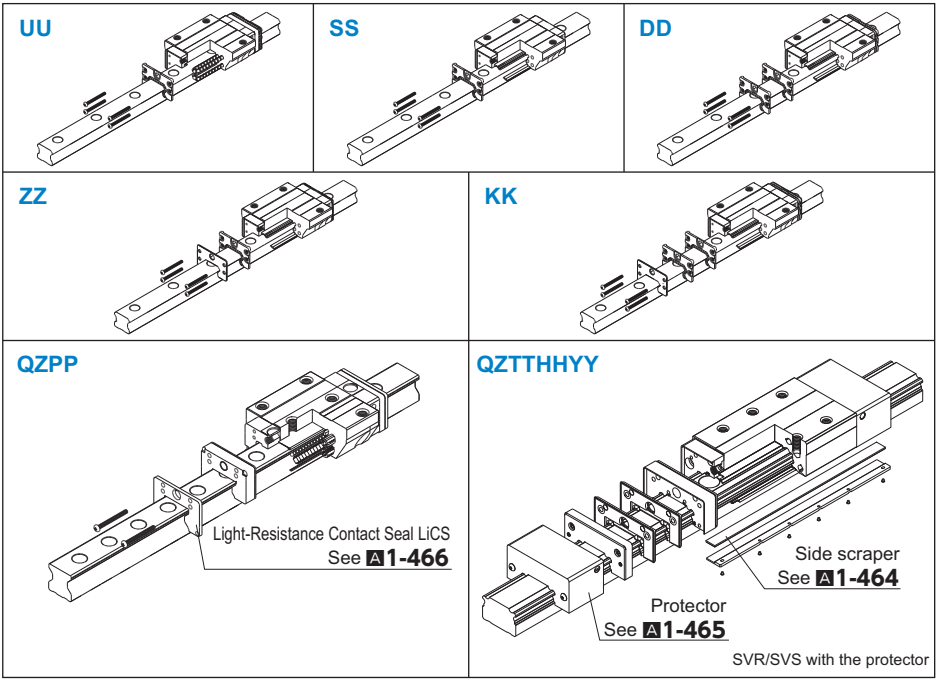
Symbol	Configuration of options
JJHH	With End seal + side seal + inner seal* + LaCS + protector (also has a metal scraper function)
TTHH	With Double seals + side seal + inner seal* + LaCS + protector (also has a metal scraper function)
JJHHYY	With End seal + side seal + inner seal* + LaCS + protector (also has a metal scraper function) + side scraper
TTHHYY	With Double seals + side seal + inner seal* + LaCS + protector (also has a metal scraper function) + side scraper
QZJJHH	With QZ + end seal + side seal + inner seal* + LaCS + protector (also has a metal scraper function)
QZTTHH	With QZ + double seals + side seal + inner seal* + LaCS + protector (also has a metal scraper function)
QZJJHHYY	With QZ + end seal + side seal + inner seal* + LaCS + protector (also has a metal scraper function) + side scraper
QZTTHHYY	With QZ + double seals + side seal + inner seal* + LaCS + protector (also has a metal scraper function) + side scraper

* Some models are not equipped with inner seals.(See A**1-456**)

Note) HH type (with LaCS) of models SVR/SVS is provided with the protector (see A**1-465**).Protector also serves as metal scraper. Contact THK if you want to use the Protector with other options.

QZZZHH





Model number coding

SVR45 LR 2 QZ TTHH C0 +1200L P T -II

- SVR45: Model No.
- LR: Type of LM block
- 2: No. of LM blocks used on the same rail
- QZ: With QZ Lubricator
- TTHH: Symbol for dust-proof accessory
- C0: Radial clearance symbol Normal (No symbol)/ Light preload (C1) Medium preload (C0)
- +1200L: LM rail length (in mm)
- P: Accuracy symbol Normal grade (No Symbol)/High accuracy grade (H)/ Precision grade (P)Super precision grade (SP)/ Ultra precision grade (UP)
- T: Symbol for LM rail jointed use
- -II: Symbol for No. of rails used on the same plane

Dedicated Bellows

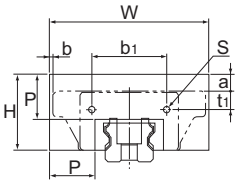
●For the supported models, see the table of options by model number on A1-456.
●For the dedicated bellows dimensions, see A1-496 to A1-507.

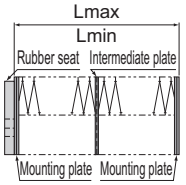
Item name	Schematic diagram / mounting location	Purpose/location of use
Dedicated Bellows		Used in locations exposed to dust or cutting chips

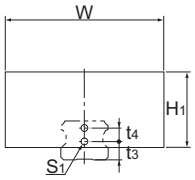
Bellows

[Dedicated Bellows JSH for Model SHS]

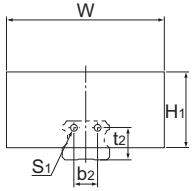
The table below shows the dimensions of dedicated bellows JSH for model SHS. Specify the corresponding model number of the desired bellows from the table.







Models SHS15 to 30



Models SHS35 to 65

* Use self-tapping screws as the mounting screws on the LM block side of the JSH15.

Note1) When desiring to use the dedicated bellows other than in horizontal mount (i.e., vertical, wall and inverted mount), or when desiring a heat-resistant type of bellows, contact THK.

Note2) For lubrication when using the dedicated bellows, contact THK.

Note3) When using the dedicated bellows, the LM block and LM rail need to be machined so that the bellows can be mounted. Be sure to indicate that the dedicated bellows is required when ordering the LM Guide.

Model number coding

JSH35 - 60/420

Model number of bellows for SHS35

Dimensions of the bellows (length when compressed / length when extended)

Note) The length of the bellows is calculated as follow.

Note1) For model JH15's location marked with "*", mounting bolts are used only on the LM rail side while the LM block side uses M2 x 5 (nominal) tapping screws.
Note2) When desiring to use the dedicated bellows other than in horizontal mount (i.e., vertical, wall and inverted mount), or when desiring a heat-resistant type of bellows, contact THK.
Note3) For lubrication when using the dedicated bellows, contact THK.
Note4) When using the dedicated bellows, the LM block and LM rail need to be machined so that the bellows can be mounted. Be sure to indicate that the dedicated bellows is required when ordering the LM Guide.

Model number coding

JH25 - 60/420

Model number of bellows for HSR25

Dimensions of the bellows (length when compressed / length when extended)

Note) The length of the bellows is calculated as follow.

$$Lmin = \frac{S}{(A-1)}$$ S: Stroke length (mm)

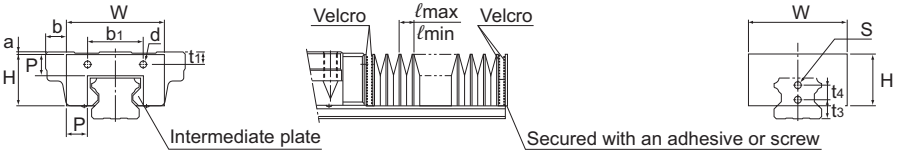
$Lmax = Lmin \cdot A$ A: Extension rate

[Dedicated Bellows DH for Model HSR]

For models HSR15, 20 and 25, bellows DH, which has the following features, is also available other than the dedicated bellows JH. Specify the corresponding model number of the desired bellows from the table.

● Features

(1) Has a width and height smaller than the conventional product so that any part of the bellows does not stick out of the top face of the LM block. The extension rate is equal to or greater than that of the conventional type.
(2) Has an intermediate plate for each crest so that it will not easily lift and the bellows can be used with vertical mount, wall mount and slant mount.
(3) Operable at high speed, at up to 120 m/min.
(4) Since a Velcro tape can be used to install the bellows, a regular-size model can be cut to the desired length, or two or more regular-size bellows can be taped together.
(5) Can be installed using screws just as bellows JH.
In this case, a plate (thickness: 1.6 mm) must be placed between the bellows and the LM bock. Contact THK for details.



Unit: mm

Model No.		Main dimensions																			Supported model numbers	
						t_1						a		b				Extension rate		Factor		
		W	H	P	b_1	A/B	R	t_3	t_4	d	s	A/B	R	A/B	R	ℓmax	ℓmin	A	E	k		
DH	15	35	19.5	8.5	25	2.5	6.5	10	—	ϕ2.5	ϕ5	0	4	6	–0.5	10	2.5	4	2	1.2	HSR	15
	20	45	25	10	34	5	5	6	8	ϕ4	ϕ4	0	0	9	–0.5	13	2.5	5	2	1.3		20
	25	52	29.5	12	30	7	11	10	8	ϕ3.5	ϕ3.5	0	4	9	–2	15	3	5	2	1.3		25

Note1) For lubrication when using the dedicated bellows, contact THK.
Note2) When using the dedicated bellows, the LM block and LM rail need to be machined so that the bellows can be mounted. Be sure to indicate that the dedicated bellows is required when ordering the LM Guide.

Model number coding

DH20 - 50/250

- DH20: Model number of bellows for HSR20
- 50/250: Dimensions of the bellows (length when compressed / length when extended)

Note) The maximum length of the bellows itself is calculated as follows.
Lmax (Lmin) = ℓmax (ℓmim) ×200
Example of calculating bellows dimensions:
When the stroke of model HSR20 is: ℓs=530mm

$$Lmin = \frac{\ell s}{(A-1)} = \frac{530}{4} = 132.5 \fallingdotseq 135$$

$$Lmax = A \cdot Lmin = 5 \times 135 = 675$$

Number of required crests n

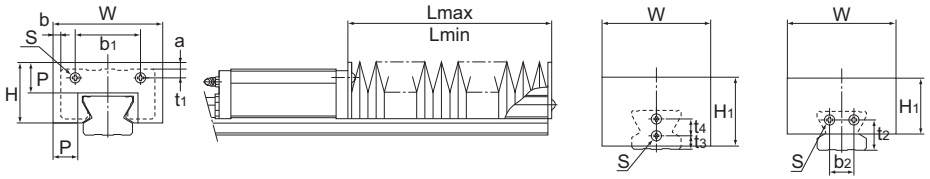
$$n = \frac{Lmax}{P \cdot k} = \frac{675}{10 \times 1.3} = 51.9 \fallingdotseq 52 \text{ crests}$$

$$Lmin = n \cdot \ell min + E = 52 \times 2.5 + 2 = 132$$

(E indicates the plate thickness of 2)
Therefore, the model number of the required bellows is DH20-132/675.

[Dedicated Bellows JS for Model SR]

The table below shows the dimensions of dedicated bellows JS for model SR. Specify the corresponding model number of the desired bellows from the table.



Models SR15 to 25 Models SR30 to 70

Unit: mm

Note1) When desiring to use the dedicated bellows other than in horizontal mount (i.e., vertical, wall and inverted mount), or when desiring a heat-resistant type of bellows, contact THK.
Note2) For lubrication when using the dedicated bellows, contact THK.
Note3) When using the dedicated bellows, the LM block and LM rail need to be machined so that the bellows can be mounted. Be sure to indicate that the dedicated bellows is required when ordering the LM Guide.

Model number coding

JS55 - 60/540

Model number of bellows for SR55

Dimensions of the bellows (length when compressed / length when extended)

Note) The length of the bellows is calculated as follow.

$$Lmin = \frac{S}{(A-1)}$$ S: Stroke length (mm)

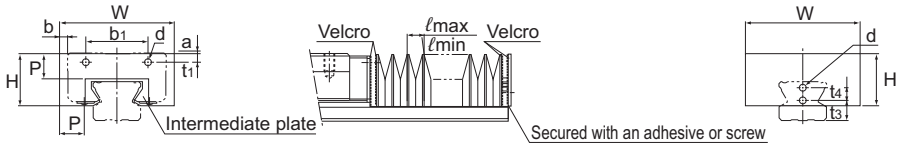
$Lmax = Lmin \cdot A$ A: Extension rate

[Dedicated Bellows DS for Model SR]

For models SR15, 20 and 25, bellows DS, which has the following features, is also available other than the dedicated bellows JS. Specify the corresponding model number of the desired bellows from the table.

● Features

(1) Has a width and height smaller than the conventional product so that any part of the bellows does not stick out of the top face of the LM block. The extension rate is equal to or greater than that of the conventional type.
(2) Has an intermediate plate for each crest so that it will not easily lift and the bellows can be used with vertical mount, wall mount and slant mount.
(3) Operable at high speed, at up to 120 m/min.
(4) Since a Velcro tape can be used to install the bellows, a regular-size model can be cut to the desired length, or two or more regular-size bellows can be taped together.
(5) Can be installed using screws just as the conventional type.
In this case, a plate (thickness: 1.6 mm) must be placed between the bellows and the LM bock. Contact THK for details.



Unit: mm

Model No.		Main dimensions																Supported model numbers	
										b				Extension rate		Factor		
		W	H	P	b_1	t_1	t_3	t_4	d	a	W/V	TB/SB	ℓmax	ℓmin	A	E	k		
DS	15	38	19	10	22	3.4	8	—	3.5	0	7	2	13	2.5	5	2	1.3	SR	15
	20	49	22	10	25	4.2	6	6	4	0	5	3.5	13	2.5	5	2	1.3		20
	25	56	26	12	29	5	6	7	4	0	8.5	4	15	3	5	2	1.3		25

Note1) For lubrication when using the dedicated bellows, contact THK.
Note2) When using the dedicated bellows, the LM block and LM rail need to be machined so that the bellows can be mounted. Be sure to indicate that the dedicated bellows is required when ordering the LM Guide.

Model number coding

DS20 - 50/250

Model number of bellows for SR20
Dimensions of the bellows (length when compressed / length when extended)

Note) The maximum length of the bellows itself is calculated as follows.
Lmax (Lmin) = ℓmax (ℓmin) ×200
Example of calculating bellows dimensions:
When the stroke of model SR20 is: ℓs=530mm

$$Lmin = \frac{\ell s}{(A-1)} = \frac{530}{4} = 132.5 \fallingdotseq 135$$

$Lmax = A \cdot Lmin = 5 \times 135 = 675$

Number of required crests n

$$n = \frac{Lmax}{P \cdot k} = \frac{675}{10 \times 1.3} = 51.9 \fallingdotseq 52 \text{ crests}$$

$Lmin = n \cdot \ell min + E = 52 \times 2.5 + 2 = 132$

(E indicates the plate thickness of 2)
Therefore, the model number of the required bellows is DS20-132/675.

[Simplified Bellows JN Dedicated for Models NR/NRS]

For models NR/NRS, bellows are available.Fig.1 To gain a higher contamination protection effect, attach a telescopic cover outside the bellows after the bellows are mounted.

Note1) When desiring to use the dedicated bellows other than in horizontal mount (i.e., vertical, wall and inverted mount), or when desiring a heat-resistant type of bellows, contact THK.
Note2) For lubrication when using the dedicated bellows, contact THK.
Note3) When using the dedicated bellows, the LM block and LM rail need to be machined so that the bellows can be mounted. Be sure to indicate that the dedicated bellows is required when ordering the LM Guide.
Note4) In case of oil lubrication, be sure to let THK know the mounting orientation and the exact position in each LM block where the piping joint should be attached.
For the mounting orientation and the lubrication, see **A1-12** and **A24-2**, respectively.

Model number coding

JSRG35 - 60/420

Model number of bellows for SRG35

Dimensions of the bellows (length when compressed / length when extended)

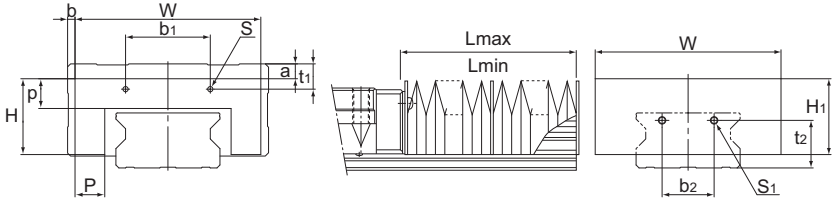
Note) The length of the bellows is calculated as follow.

$$Lmin = \frac{S}{(A-1)}$$ S: Stroke length (mm)

$Lmax = Lmin \cdot A$ A: Extension rate

[Dedicated Bellows JSRW for Model SRW]

The table below shows the dimensions of dedicated bellows JSRW for model SRW. Specify the corresponding model number of the desired bellows from the table.



Unit: mm

Cap C

If any of the LM rail mounting holes of an LM Guide is filled with cutting chips or foreign material, they may enter the LM block structure. Entrance of such foreign material can be prevented by covering each LM rail mounting hole with the dedicated cap.
Since the dedicated cap C for LM rail mounting holes uses a special synthetic resin with high oil resistance and high wear resistance, it is highly durable.
To attach the dedicated cap to the mounting hole, place a flat metal piece like one shown in Fig.1 on the cap and gradually hammer in the cap until it is on the same level as the top face of the LM rail. When attaching the dedicated cap C for LM rail mounting holes, do not remove any of the LM blocks from the LM rail.

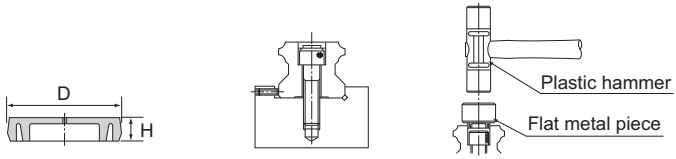

Fig.1 Cap C

Table1 List of Model Numbers Supported for the Dedicated Cap C for LM Rail Mounting Holes

Model No.	Bolt used	Main dimensions (mm)		Supported model number

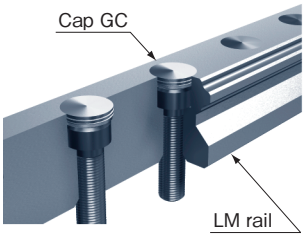
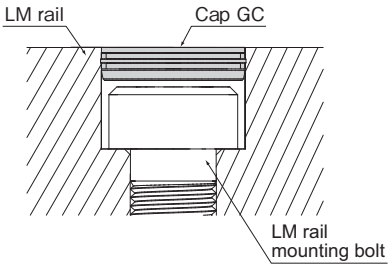
C24	M24	39.5	7.7	—	—	—	100	100	—	—	100	—	—	—	—	—	—

Note) The dedicated cap for the LM rail mounting hole can be made of other materials (e.g., metal). Contact THK for details.

Cap GC

●For notes regarding how to handle the GC cap, see A1-530.



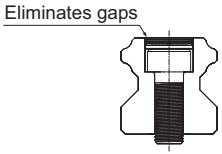


GC caps are metal caps designed to cover the mounting holes in LM rails (in compliance with RoHS directives).
In harsh environments, preventing any influx of coolant or foreign material from the top face of the LM rail, coupled with the use of seals, will dramatically improve the contamination protection performance for the LM guide.

[Features]

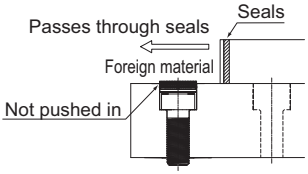
- **Eliminating gaps around the mounting holes (countersunk holes)**

The GC caps press into the mounting holes (countersunk holes) so that there are no gaps.



- **Provides long-term sealing due to its excellent abrasion resistance**

If a countermeasure such as a seal passes along the rail when there is foreign matter on the upper surface of the LM rail, it generates force pushing the GC cap in from above. In this situation, the cap does not get pushed inwards as it is easily strong enough to stay in place.



- **GC caps are highly effective in a range of different environments.**

Service environment			LM Guide		Example of Using the Spring Pad
			Standard C cap fitted	GC cap fitted	
Poor environment	Foreign matter concentration: Low	Metal powder, sputtering	○	◎	Welding machines, robots
		Wood shavings, coolant (Environments that strip away oils)	○	◎	Woodworking machinery, washers
		Metal powder + coolant	○	◎	Lathes, machining centers
	Foreign matter concentration: High	Metal powder, sputtering	△	◎	Welding machines, robots
		Wood shavings, coolant (Environments that strip away oils)	△	◎	Woodworking machinery, washers
		Metal powder + coolant	△	◎	Lathes, machining centers

◎:Particularly effective ○:Effective △:Not particularly effective

[Dimensions, applicable model number]

● Specification Table

Unit: mm

Model No.	Outer diameter D	Thickness H
GC5	9.86	2.5
GC6	11.36	2.5
GC8	14.36	3.5
GC10	17.86	3.5

Model number coding

SVR45 LR 2 QZ TTHH C0 +1200L P -II GC

- SVR45: Model No.
- LR: Type of LM block
- 2: No. of LM blocks used on the same rail
- QZ: With QZ Lubricator
- TTHH: Contamination protection accessory symbol
- C0: Radial clearance symbol
  - Normal (No symbol)
  - Light preload (C1)
  - Medium preload (C0)
- +1200L: LM rail length (in mm)
- P: Accuracy symbol
  - Normal grade (No Symbol)/High accuracy grade (H)
  - Precision grade (P)/Super precision grade (SP)
  - Ultra precision grade (UP)
- -II: Symbol for No. of rails used on the same plane
- GC: With GC cap

Note1) LM guides with GC caps are special rails.
Note2) They cannot be mounted on stainless steel LM rails or LM rails that have undergone surface treatment.
Note3) If this product will be used in special environments, such as in a vacuum or at very low or high temperatures, contact THK.
Note4) GC caps are not sold individually. They are sold as a set with LM guides.
Note5) The openings of LM rail mounting holes are not chamfered. Take care not to injure your hands while working.
Note6) After fitting GC caps, the upper surface of the LM rail must be flattened and cleaned (wiped).
Note7) If you wish to fit GC caps for a single rail, use the sample model number configuration shown below.

(Example) SVR45LR2QZTTHHC0+1200LPGC — With GC cap
* Add the symbol (GC) to the end of the model number.

● **Mounting method**

The procedure for inserting a GC cap into a mounting hole consists of using a flat aligning fitting to gradually punch the cap into the hole until it is level with the upper surface of the LM rail, as shown in the figure. Fit GC caps without removing the LM rail from the LM block.

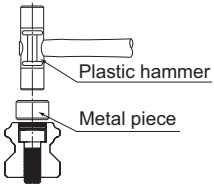

Plate Cover SV Steel Tape SP

●For the supported models, see the table of options by model number on A1-456.

Item name	Schematic diagram / mounting location	Purpose/location of use
Plate Cover SV		For the LM Guide, steel tapes are available as a means of contamination protection for machine tools. By covering the LM rail mounting holes with an ultra-thin stainless steel (SUS304) plate, the plate cover SV drastically increases sealability, thus to prevent the penetration of a coolant or cutting chips from the top face of the LM rail. For the mounting method, see **A1-515**. Note) When mounting the plate cover, the LM rail needs to be machined. Indicate that the plate cover is required when ordering the LM Guide.
Steel Tape SP		For the LM Guide, steel tapes are available as a means of contamination protection for machine tools. By covering the LM rail mounting holes with an ultra-thin stainless steel (SUS304) plate, the steel tape SP drastically increases sealability, thus to prevent the penetration of a coolant or cutting chips from the top face of the LM rail. (When mounting the steel tape, end piece EP can be used as a means to secure the cover.) For the mounting method, see **A1-516**. Note) When mounting the steel tape, the LM rail needs to be machined. Indicate that the steel tape is required when ordering the LM Guide.

[Mounting Procedure for Plate Cover SV]

(1) Attach slide pieces to the plate cover.
Place the slide pieces on the plate cover with their chamfered sides facing outward, hold the plate cover with the slide pieces and the securing plates, and then secure them with countersunk screws.

(2) Use an LM block mounting/removing jig to remove the LM block from the LM rail, and then mount the fixing-jigs onto the LM rail.

(3) Temporarily secure either slide piece.
Insert either slide piece into one of the fixing-jigs, then attach the slide piece to the LM rail's end face using the tension adjustment bolt and gently secure the bolt until the bolt head is inside the fixing-jig.

(4) Temporarily secure the other slide piece.
Temporarily secure the other slide piece in the same manner as above.

(5) Apply tension to the plate cover.
Apply tension to the plate cover by evenly securing the tension adjustment bolts on both ends of the LM rail. Make sure there is only a small difference between the H and H' dimensions in Fig.5. If the difference is too large, there may be no interference left on either end.

(6) Mount the LM block on the LM rail.
Identity the reference surface of the LM rail and the LM block, then insert the LM rail into the LM block using the LM block mounting / removing jig.

Note1) When removing or the mounting the LM block, use much care not to let the balls fall off.
Note2) The plate cover is an ultra-thin stainless steel (SUS304) plate. When handing it, use much care not to bend it.
Note3) The plate cover is available for models NR/NRS35 to 100.

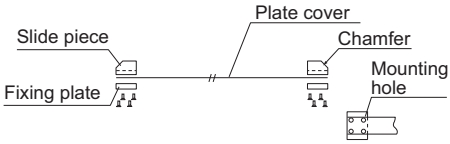

Fig.1

Fig.2

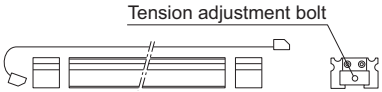

Fig.3

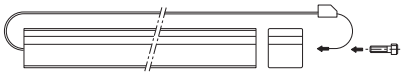

Fig.4

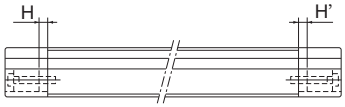

Fig.5

[Mounting Procedure for Steel Tape SP]

(1) Use an LM block mounting/removing jig to remove the LM block from the LM rail.
(2) Thoroughly degrease and clean the top face of the LM rail, to which the steel tape is to be adhered. For degreasing, use an adequately volatile detergent (e.g., industrial alcohol).
(3) Carefully adhere the steel tape from the end with care not to let it bend or sag, while gradually peeling the release paper from the steel tape.
(4) Have the steel tape settle on the rail by rubbing the tape. The adhesive strength increases with time. The adhering tape can be peeled off by pulling its end upward.
(5) Mount the LM block onto the LM rail using the LM block mounting/removing jig.
(6) Attach the end pieces on both ends of the LM rail and further secure the steel tape. When securing the end pieces, fasten only the setscrew on the top face of each end piece.
(The tap on the end face of the end piece is used for mounting bellows.)

Note1) The setscrew on the side face is used to lightly secure the bent steel tape. Be sure to stop fastening the screw as soon as it hits the end face, and do not force the screw further.
Note2) Since the steel tape is a thin steel plate, mishandling it may cause an accident such as cutting your finger. When handling it, take an effective safety measure such as wearing rubber gloves.

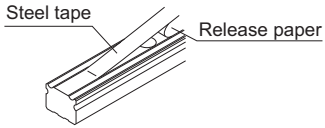

Fig.9

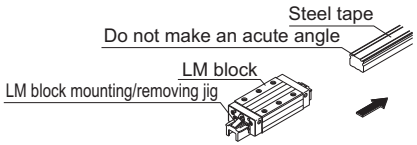

Fig.10

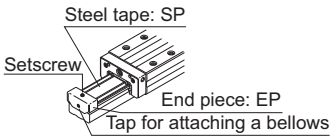

Fig.11

Lubrication Adapter

An oil lubricant-only lubrication adapter is available for models NR/NRS.
Even if the LM Guide is installed in an orientation where oil lubrication is difficult, such as wall mount and inversed mount, the adapter is capable of feeding a constant quantity of lubricant to the four raceways.

[Features]

The dedicated lubrication adapter for models NR-NRS is built in with a constant quantity distributor. Therefore, the adapter can accurately feed a constant quantity of lubricant to each raceway regardless of the mounting orientation.
The adapter is economical since it is capable of constantly feeding the optimum amount of lubricant and helping eliminate the supply of surplus lubricant.
To provide pipe arrangement, simply connect an intermittent lubrication pump widely used for ordinary machine tools to the greasing holes (M8) on the front and the side of the lubrication adapter.

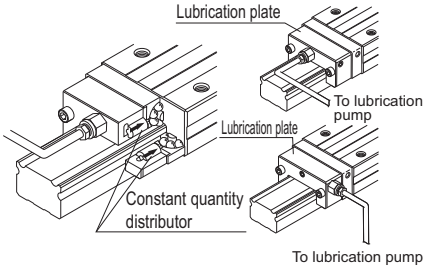

Fig.1 Structural Drawing

[Specifications]

Viscosity range of lubricant used	32 to 64 mm²/s recommended
Discharge	0.03×4, 0.06×4cc/1shot
Diameter of pipe connected	ϕ4, ϕ6
Material	Aluminum alloy

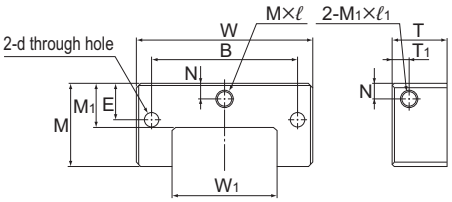

Fig.2

Table1 Dimension Table for Lubrication Adapter

Unit: mm

Model No.	Main dimensions												Quantity per shot (cc/shot)
	Width W	Height M	T	W_1	M_1	B	E	N	T_1	d	M×ℓ	M_1×ℓ_1

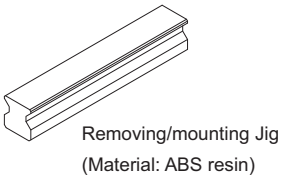
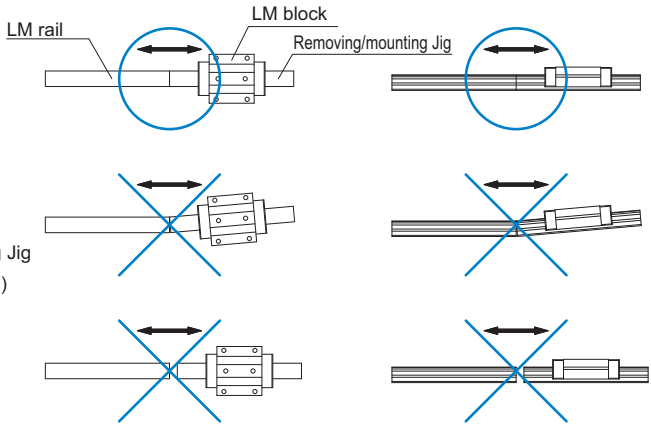
A85N	147	68.5	25	92	34	114	32	15.5	7.8	9	M8×8	M8×8	

Removing/mounting Jig

When assembling the guide, do not remove the LM block from the LM rail whenever possible. If it is inevitable to remove the LM block due to the plate cover type or the assembly procedure, be sure to use the removing/mounting jig.
Mounting the LM block without using the removing/mounting jig may cause rolling elements to fall from the LM block due to contamination by foreign material, damage to internal components or slight inclination. Mounting the LM block with some of the rolling elements missing may also cause damage to the LM block at an early stage.
When using the removing/mounting jig, do not incline the jig and match the ends of both LM rails.
The removing/mounting jig may not be available, depending on model. If this is the case, use a spare LM rail. Contact THK for details.
If any of the rolling elements falls from the LM block, contact THK instead of using the product.
Note that the removing/mounting jig is not included in the LM Guide package as standard. When desiring to use it, contact THK.



Removing/mounting Jig
(Material: ABS resin)



End Piece EP

For those models whose balls may fall if the LM rail is pulled out of the LM block, an end piece is attached to the product to prevent the LM block from being removed from the LM rail.
For models that can use the end piece, see the table below.
If removing the end piece when using the LM Guide, be sure that the LM block will not overshoot.
The end piece can also be used as a fixing jig for a steel tape, and is available also for the LM rail of models SSR, SR and HSR.

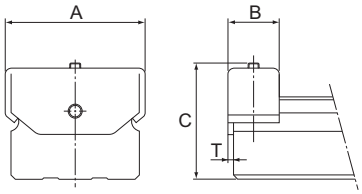


Fig.1 End Piece EP for Models NR/NRS

- M: Stainless steel LM rail
- -Ⅱ: Symbol for No. of rails used on the same plane (*4)

(*1) See contamination protection accessory on **A1-492**. (*2) See **A1-70**. (*3) See **A1-75**. (*4) See **A1-13**.

Note) This model number indicates that a single-rail unit constitutes one set. (i.e., required number of sets when 2 rails are used in parallel is 2 at a minimum.)

[Cross LM Guide]

● **Models SCR, CSR and MX**

4 SCR25 QZ KKHH C0 +1200/1000L P

- 4: Total No. of LM blocks
- SCR25: Model No.
- QZ: With QZ Lubricator
- KKHH: Contamination protection accessory symbol (*1)
- C0: Radial clearance symbol (*2) — Normal (No symbol)/Light preload (C1), Medium preload (C0)
- +1200/1000L: LM rail length on the X axis (in mm) / LM rail length on the Y axis (in mm)
- P: Accuracy symbol (*3) — Precision grade (P)/Super precision grade (SP), Ultra precision grade (UP)

(*1) See contamination protection accessory on **A1-492**. (*2) See **A1-70**. (*3) See **A1-75**.

[Separate LM Guides]

● Model HR

2 HR2555 UU M +1000L P T M

- 2: No. of LM blocks used on the same rail
- HR2555: Model No.
- UU: Contamination protection accessory symbol (*1)
- M: Stainless steel LM block
- +1000L: LM rail length (in mm)
- P: Accuracy symbol (*2) Normal grade (No Symbol)/High accuracy grade (H)/Precision grade (P) Super precision grade (SP)/Ultra precision grade (UP)
- T: Symbol for LM rail jointed use
- M: Stainless steel LM rail

(*1) See contamination protection accessory on **A1-492**. (*2) See **A1-75**.

Note) One set of model HR means a combination of two LM rails and an LM blocks used on the same plane.

● Model GSR

● LM block

GSR25 T UU

- GSR25: Model number
- T: Type of LM block
- UU: Contamination protection accessory symbol (*1)

● LM rail

GSR25 -1060L H K

- GSR25: Model number
- -1060L: LM rail length (in mm)
- H: Symbol for tapped-hole LM rail type
- K: Accuracy symbol (*2) Normal grade (No Symbol) High accuracy grade (H) Precision grade (P)

(*1) See contamination protection accessory on **A1-492**. (*2) See **A1-75**.

● Combination of LM rail and LM block

GSR25 T 2 UU +1060L H T K

- GSR25: Model No.
- T: Type of LM block
- 2: No. of LM blocks used on the same rail
- UU: Contamination protection accessory symbol (*1)
- +1060L: LM rail length (in mm)
- H: Accuracy symbol (*2) Normal grade (No Symbol)/High accuracy grade (H)/Precision grade (P)
- T: Symbol for LM rail jointed use
- K: Symbol for tapped-hole LM rail type

(*1) See contamination protection accessory on **A1-492**. (*2) See **A1-75**.

Note) One set of model GSR: This model number indicates that a single-rail unit constitutes one set.

[R Guide]

● Model HCR

HCR25A 2 UU C1 +60 / 1000R H 6 T

- HCR25A: Model No.
- 2: No. of LM blocks used on the same rail
- UU: Contamination protection accessory symbol (*1)
- C1: Radial clearance symbol (*2) Normal (No symbol)/Light preload (C1)
- +60: R-Guide center angle
- 1000R: LM rail radius (in mm)
- H: Accuracy symbol (*3) Normal grade (No Symbol)/High accuracy grade (H)
- 6: Number of LM rail joints used on one axis (*4)
- T: Symbol for LM rail jointed use

(*1) See **A1-492** (contamination protection accessories). (*2) See **A1-70**. (*3) See **A1-75**.
(*4) Number of LM rails used on one arc. For details, contact THK.

[Straight-Curved Guide]

● Model HMG

When 2 rails are used

HMG15A 2 UU C1 +1000L T + 60/150R 6T + 60/300R 6T -Ⅱ

- Model No.
- Contamination protection accessory symbol (*1)
- Overall linear LM rail length per rail
- Center angle of one inner curved rail
- No. of inner curved LM rails jointed
- Radius of outer curved rail
- Symbol for No. of rails used on the same plane (*2)

- No. of LM blocks used on the same rail
- Radial clearance symbol: Normal (No symbol)/Light preload (C1)
- Symbol for linear LM rail joint
- Radius of inner curved rail
- Center angle of one outer curved rail
- No. of outer curved LM rails jointed

(*1) See contamination protection accessory on A1-492. (*2) See A1-13.

Note) This model number denotes one set consists of an LM block and LM rail. (i.e. If you are using 2 shafts, the required number of sets is 2.)
Model HMG does not have a seal as standard.

[LM Guide for Medium-to-Low Vacuum]

● Model HSR-M1VV

HSR15M1R 1 VV C1 +400L P -Ⅱ

- Model No.
- No. of LM blocks used on one rail
- Labyrinth seal symbol (*2)
- Radial clearance symbol (*1)
- LM rail length (in mm)
- Accuracy symbol (*3)
- Symbol for No. of rails used on the same plane (*4)

(*1) See A1-70 (*2) See A1-379 (*3) See A1-75 (*4) See A1-13.

Note1) The radial clearance, maximum LM rail length and accuracy class are equal to that of model HSR.
Note2) With this model, a single-rail unit constitutes one set (i.e., the required number of sets when 2 rails are used in parallel is 2).

[Oil-Free LM Guide for Special Environments]

● Model SR-MS

SR15MSV 1 CS +340L P -Ⅱ

- Model No.
- No. of LM blocks used on one rail
- Radial clearance symbol (*1)
- LM rail length (in mm)
- Accuracy symbol (*2)
- Symbol for No. of rails used on the same plane (*3)

(*1) See A1-70. (*2) See A1-75. (*3) See A1-13.

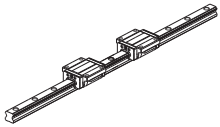
Note) With this model, a single-rail unit constitutes one set (i.e., the required number of sets when 2 rails are used in parallel is 2).

Notes on Ordering

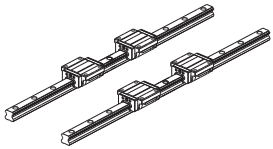
[Order units]

Note that the number of items that constitute one set differs depending on the type of LM guide. Check the sample model number configurations and the accompanying notes.

- **Sample LM guide orders**

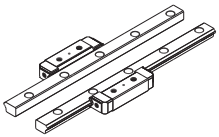


SHS25C2SSC1+640L 1 set



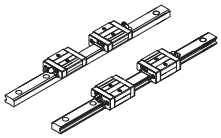
SHS25C2SSC1+640L-Ⅱ 2 sets

- **Sample model HR orders**



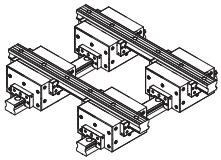
HR2555UU+600L 1 set

- **Sample model GSR and GSR-R orders**



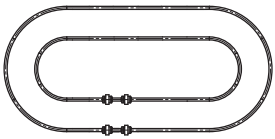
GSR25T2UU+1060L 2 sets

- **Sample cross LM guide orders (SCR, CSR and MX)**



4SCR25UU+1200/1000LP 1 set

- **Sample model HMG orders**



HMG15A 2 UU C1 +1000L T + 60/150R 6T + 60/300R 6T - Ⅱ 2 sets

Note) When ordering model HMG, attach a reference diagram clearly showing the positioning of the LM block and LM rail.

[Mounted orientation and lubrication method]
When placing an order, be sure to let THK know the mounting orientation and the exact position in each LM block where the grease nipple or the piping joint should be attached.
For the mounting orientation and the lubrication, see **A1-12** and **A24-2**, respectively.

[Supported options]
The supported options differ depending on the model number. Check the available options when ordering.
See **A1-456**.

[Maximum manufactured lengths for LM rails]
Where a high degree of precision is required, limits apply to the maximum manufactured lengths for LM rails. In such situations, contact THK.

Precautions on Using the LM Guide

[Handling]

(1) Please use at least two people to move any product weighing 20 kg or more, or use a dolly or another conveyance. Doing so may cause injury or damage.
(2) Do not disassemble the parts. This will result in loss of functionality.
(3) Tilting an LM block or LM rail may cause them to fall by their own weight.
(4) Take care not to drop or strike the LM Guide. Doing so may cause injury or damage. Giving an impact to it could also cause damage to its function even if the product looks intact.
(5) Do not remove the LM block from the LM rail during setup.
(6) Do not insert hands or fingers into the mounting holes on the LM rail, as they could get caught between the rail and the LM block, resulting in injury.
(7) To ensure personal safety, wear gloves and protective footwear when handling this product.

[Precautions on Use]

(1) Prevent foreign material, such as cutting chips or coolant, from entering the product. Failure to do so may cause damage.
(2) If the product is used in an environment where cutting chips, coolant, corrosive solvents, water, etc., may enter the product, use bellows, covers, etc., to prevent them from entering the product.
(3) Do not use this product if the external temperature exceeds 80℃. Unless the unit is specially designed to be heat-resistant, exposure to such temperatures may deform or damage plastic and rubber parts.
(4) If foreign material such as cutting chips adheres to the product, replenish the lubricant after cleaning the product.
(5) Micro-strokes tend to obstruct oil film to form on the raceway in contact with the rolling element, and may lead to fretting corrosion. Take consideration using grease offering excellent fretting prevention. It is also recommended that a stroke movement corresponding to the length of the LM block be made on a regular basis to make sure oil film is formed between the raceway and rolling element.
(6) Do not use undue force when fitting parts (pin, key, etc.) to the product. This may generate permanent deformation on the raceway, leading to loss of functionality.
(7) If, for operational reasons, it becomes absolutely necessary to remove the LM block from the LM rail and reattach it, a special mounting jig must be used for this purpose. (The mounting jig is not included with standard versions of the product. To obtain one, please contact THK.)
(8) Position the mounting jig so that one end abuts the end of the LM rail. When the rail and the jig are exactly aligned, the LM block can be loaded onto the rail.
(9) Take care to keep the LM block straight. Loading the block at an angle can introduce foreign matter, damage internal components, or cause balls to fall out.
(10) The LM block must contain all its internal rolling elements (balls) when mounted on the LM rail. Using a block with any balls removed may result in premature damage.
(11) Please contact THK if any balls fall out of the LM block; do not use the block if any balls are missing.

(12) If the end plate is damaged due to an accident, etc., balls may fall out or the LM block may become detached from the LM rail and drop. If the LM Guide will be used hanging upside down, take preventive measures such as adding a safety mechanism to prevent falls.
(13) Insufficient rigidity or accuracy of mounting members causes the bearing load to concentrate on one point and the bearing performance will drop significantly. Accordingly, give sufficient consideration to the rigidity/accuracy of the housing and base and strength of the fixing bolts.
(14) When removing the LM block from the LM rail and then replacing the block, an LM block mounting/removing jig that facilitates such installation is available. Contact THK for details.

[Lubrication]
(1) Thoroughly remove anti-rust oil and feed lubricant before using the product.
(2) Do not mix different lubricants. Mixing greases using the same type of thickening agent may still cause adverse interaction between the two greases if they use different additives, etc.
(3) When using the product in locations exposed to constant vibrations or in special environments such as clean rooms, vacuum and low/high temperature, use the grease appropriate for the specification/environment.
(4) When lubricating the product having no grease nipple or oil hole, apply grease directly on the raceway and stroke the product several times to let the grease spread inside.
(5) The consistency of grease changes according to the temperature. Take note that the slide resistance of the LM Guide also changes as the consistency of grease changes.
(6) After lubrication, the slide resistance of the LM Guide may increase due to the agitation resistance of grease. Be sure to perform a break-in to let the grease spread fully, before operating the machine.
(7) Excess grease may scatter immediately after lubrication, so wipe off scattered grease as necessary.
(8) The properties of grease deteriorate and its lubrication performance drops over time, so grease must be checked and added properly according to the use frequency of the machine.
(9) Although the lubrication interval may vary according to use conditions and the service environment, lubrication should be performed approximately every 100 km in travel distance (three to six months). Set the final lubrication interval/amount based on the actual machine.
(10) If the mounting orientation is other than horizontal use, the lubricant may not reach the raceway completely. For the mounting orientation and the lubrication, see B**1-28** and B**24-2**, respectively.
(11) When adopting oil lubrication, the lubricant may not be distributed throughout the LM block depending on the mounting orientation of the block. Contact THK in advance for details.

[Storage]
When storing the LM Guide, enclose it in a package designated by THK and store it in a room in a horizontal orientation while avoiding high temperature, low temperature and high humidity.
After the product has been in storage for an extended period of time, lubricant inside may have deteriorated, so add new lubricant before use.

[Disposal]
Dispose of the product properly as industrial waste.

Precautions on Handling the LM Guide for Special Environment

LM Guide for Medium-to-Low Vacuum

[Handling]

(1) This product has been thoroughly cleaned and degreased and then sealed in moisture-proof packaging. If possible, open the package immediately prior to using the product.
(2) Once the packaging has been opened, store the product inside a clean, dry receptacle accompanied by silica gel or another drying agent. Do not use anti-rust oil or corrosion- or tarnish-preventive paper or fluid with this product.
(3) Wear protective rubber or vinyl gloves while handling this product and make sure the surrounding environment is relatively clean.

Oil-Free LM Guide

[Handling]

(1) The Oil-Free LM Guide is suitable for use at high temperatures, under atmospheric pressure or in a high-vacuum environment of 10^{-6} Pa, and is designed for ultra-low dust emission. It is not intended for use in locations requiring rigidity. Because a preload would affect the strength of its Dry Lubrication S-Compound Film, it does not support preloads.
(2) The product can be used in temperatures ranging from −20 to 150℃.
(3) To ensure proper function of the Dry Lubrication S-Compound Film, use this product in an environment free from condensation, at a humidity level of 40% or less.
(4) This product is not intended for joint use.
(5) Great care must be taken in the installation of the Oil-Free LM Guide, which requires greater precision compared to standard LM Guides.
(6) If the LM block is removed from the LM rail, balls may fall out, and the Dry Lubrication S-Compound Film can be damaged when the block is remounted. If it becomes necessary to remove the LM block from the LM rail, please contact THK.
(7) This product should be stored in a horizontal position, in its original wrapping and package, in a controlled, stable environment free from abnormal high or low temperatures or high humidity. THK recommends storing it at room temperature (25±5℃), with a humidity level of 40% RH or lower and an air-purity level of 10,000 or lower.
(8) This product has been thoroughly cleaned and degreased and then sealed in moisture-proof packaging. If possible, open the package immediately prior to using the product.
(9) Once the packaging has been opened, store the product inside a clean, dry receptacle accompanied by silica gel or another drying agent. Do not use anti-rust oil or corrosion- or tarnish-preventive paper or fluid with this product.
(10) Wear protective rubber or vinyl gloves while handling this product and make sure the surrounding environment is relatively clean.

Precautions on Using Options for the LM Guide

QZ Lubricator for the LM Guide

For details regarding the QZ, see A1-485.

[Precaution on Selection]
Secure a stroke longer than the overall LM block with QZ Lubricator attached.

[Handling]
Take care not to drop or strike this product. This could cause injury or product damage.
Do not block the vent hole with grease or the like.
The QZ device supplies oil only to the raceway, so use it in combination with regular greasing/lubrication. If the product is used in an environment exposed to coolant, cutting chips or other foreign material, oil on the raceway is lost easily. Accordingly, be sure to also use covers, bellows, etc.

[Service environment]
Be sure the service temperature of this product is between −10 to 50℃, and do not clean the product by immersing it in an organic solvent or white kerosene, or leave it unpacked.

Laminated Contact Scraper LaCS, Side Scraper for LM Guides

For details regarding the LaCS, see A1-462. For details regarding the side scraper, see A1-464.

[Handling]
The lubricant impregnated into the scraper is used to increase its sliding capability. For lubrication of the LM Guide, attach QZ Lubricator, or the grease nipple on the side face of the end plate of the LM block, before providing a lubricant.
When using the product, be sure to attach the rail cap C or the plate cover.

[Service environment]
Be sure the service temperature of this product is between -20 to +80℃, and do not clean the product by immersing it in an organic solvent or white kerosene, or leave it unpacked.

[Notes on the Product Functions]
It is specifically designed to provide dust prevention capability to remove foreign material and liquid. To seal oil, an end seal is required.

Light Contact Seal LiCS for LM Guides

For details regarding the LiCS, see A1-466.

[Handling]
The lubricant impregnated into LiCS is used to increase its sliding capability. For lubrication of the LM Guide, attach the grease nipple on the end plate of the LM block before providing a lubricant.

[Service environment]
Be sure the service temperature of this product is between -20 to +80℃, and do not clean the product by immersing it in an organic solvent or white kerosene, or leave it unpacked.
It contacts only with the LM rail raceway. Do not use it in harsh environments.

Cap GC

For details regarding the GC cap, see A1-511.

[Handling]
If GC caps are specified for the product, the edges of the LM rail mounting hole openings will be sharp. Take great care not to injure your fingers or hands while working.
When fitting GC caps, use a flat aligning tool to gradually punch the cap into the hole until it is level with the upper surface of the LM rail. Then run an oil stone over the rail until the upper surface of the rail and the GC caps are completely flat.
